Job Summary:

As an Analyst, this candidate will work directly with mid to senior level management and report to a VP or Director on typical deal teams as assigned. The Analyst will take the lead on assigned modelling, presentations and other deliverables as needed. Other responsibilities will include participation in financial and business due diligence, pre-engagement planning and execution, and support Associate/Senior Associate with final deliverable development.

Responsibilities include:

- Create and maintain complex financial models and valuation analyses, including DCF, trading comparables, tax equity structures and debt financing
- Participate in day-to-day deal execution, interacting with deal team members and potentially client teams, transaction counterparties and other advisors
- Assist clients in due diligence by coordinating the information flow, attending meetings between the parties, as well as reviewing and analyzing company information
- Work independently, producing high quality deliverables such as Confidential Investment Memorandums, Board materials and other presentation materials for use in tax equity financing and M&A transactions or client pitches
- Analyze and assist with tax equity structures
- Support due diligence process, including management of the virtual data room
